Optimize the hair growth environment  
Facial skin tightening and lifting  
Postpartum Hair Loss Solution

# Understanding Your

# Hair Loss Classification

D'MED delivers substantial benefits for individuals experiencing hair loss across a spectrum from stage one to stage four.

## Level 1

### Stage One Hair Loss

A normal hairline.

A receding hairline with a slightly elevated forehead.

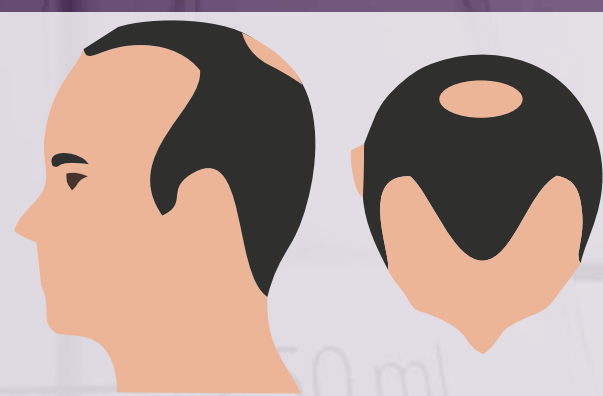

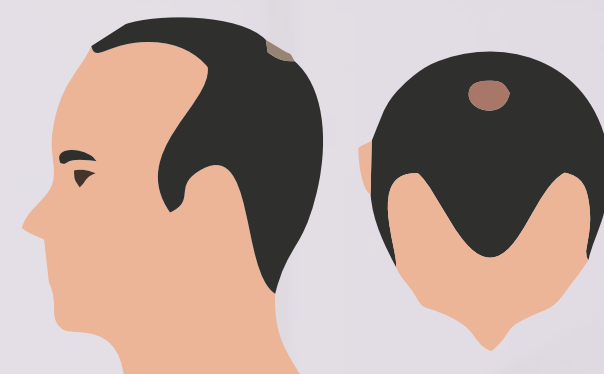

## Level 2

### Stage Two Hair Loss

## Level 3

### Stage Three Hair Loss

A noticeable recession of the hairline.

Pronounced frontal baldness, with generalized thinning at the crown and the presence of fine, soft hair.

## Level 4

### Stage Four Hair Loss

## Level 5

### Stage Five Hair Loss

Hair loss extends across the forehead and crown, forming a distinct band covering a larger area.

Significant frontal hair loss with pronounced thinning extending toward the crown.

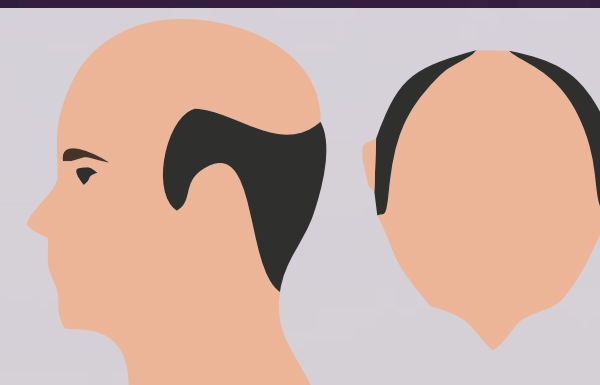

## Level 6

### Stage Six Hair Loss

## Level 7

### Stage Seven Hair Loss

The most severe level, where hair remains predominantly at the nape of the neck and around the ears.

# Elevating Beyond Conventional

## Hair Regrowth Solutions

### D'MED Harnesses Scalp Cell Activation Technology

Alcohol-Free Patented Hair Regrowth | Nutrient-Enriched Synergy  
Follicular Hair Restoration

#### Vitamin B7

A vital component of skin cells, influencing follicle health.

#### Vitamin B3

Assists in activating hair regeneration, promoting a healthy scalp.

#### Vitamin B5

Nourishes follicles, providing the necessary nutrients for stronger and more resilient hair.

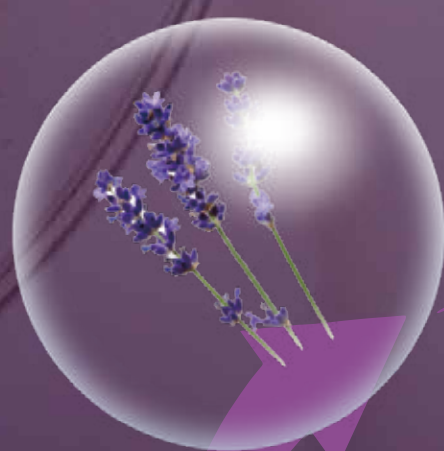

### Three Essential Elements

## Korean Hand-Harvested Treasure Crafted with the Artistry of France

#### Lavandula Angustifolia Oil

Antioxidants in lavender essential oil help slow down hair aging, provide antimicrobial and anti-inflammatory benefits, relieve scalp itching and inflammation, and contribute to scalp rejuvenation.

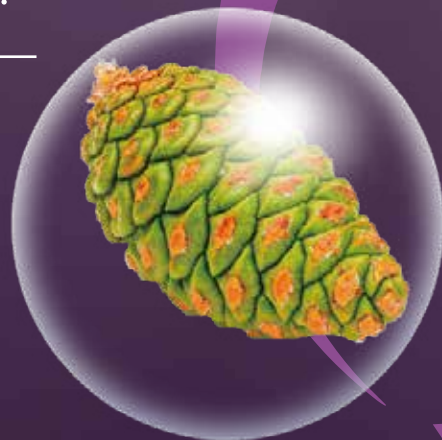

#### Prunella Vulgaris Extract

Prunella Vulgaris is considered a natural adaptogen that can assist in reducing the risk of stress-induced hair loss.

#### Europaea Wood Extract

Penetrates deep into follicles, reawakening dormant scalp stem cells, enhancing hair density, particularly in instances of hereditary hair loss or male pattern baldness, and refining hair texture.

#### Camellia Sinensis Leaf Extract

Abundant in catechins, antioxidants that decelerate follicle aging, diminish hair loss issues stemming from scalp aging, and shield the scalp against UV radiation and damage from free radicals.

Highly Penetrating Active Peptides  
with Versatile Functions

#### Palmitoyl Tetrapeptide-20

This peptide is known for its reparative properties on gray hair. It effectively retards the formation of up to 40% gray hair and facilitates the enhancement of hair melanin.

Young individuals,

increasingly burdened by stress

are confronting progressively severe hair loss challenges.

Hair loss is no longer confined to the elderly;  
it is a concern affecting the younger generation as well.

D'MED Clinical Trials
