Shampoo

**100%**  
Antibacterial Biological  
Restoration Technology

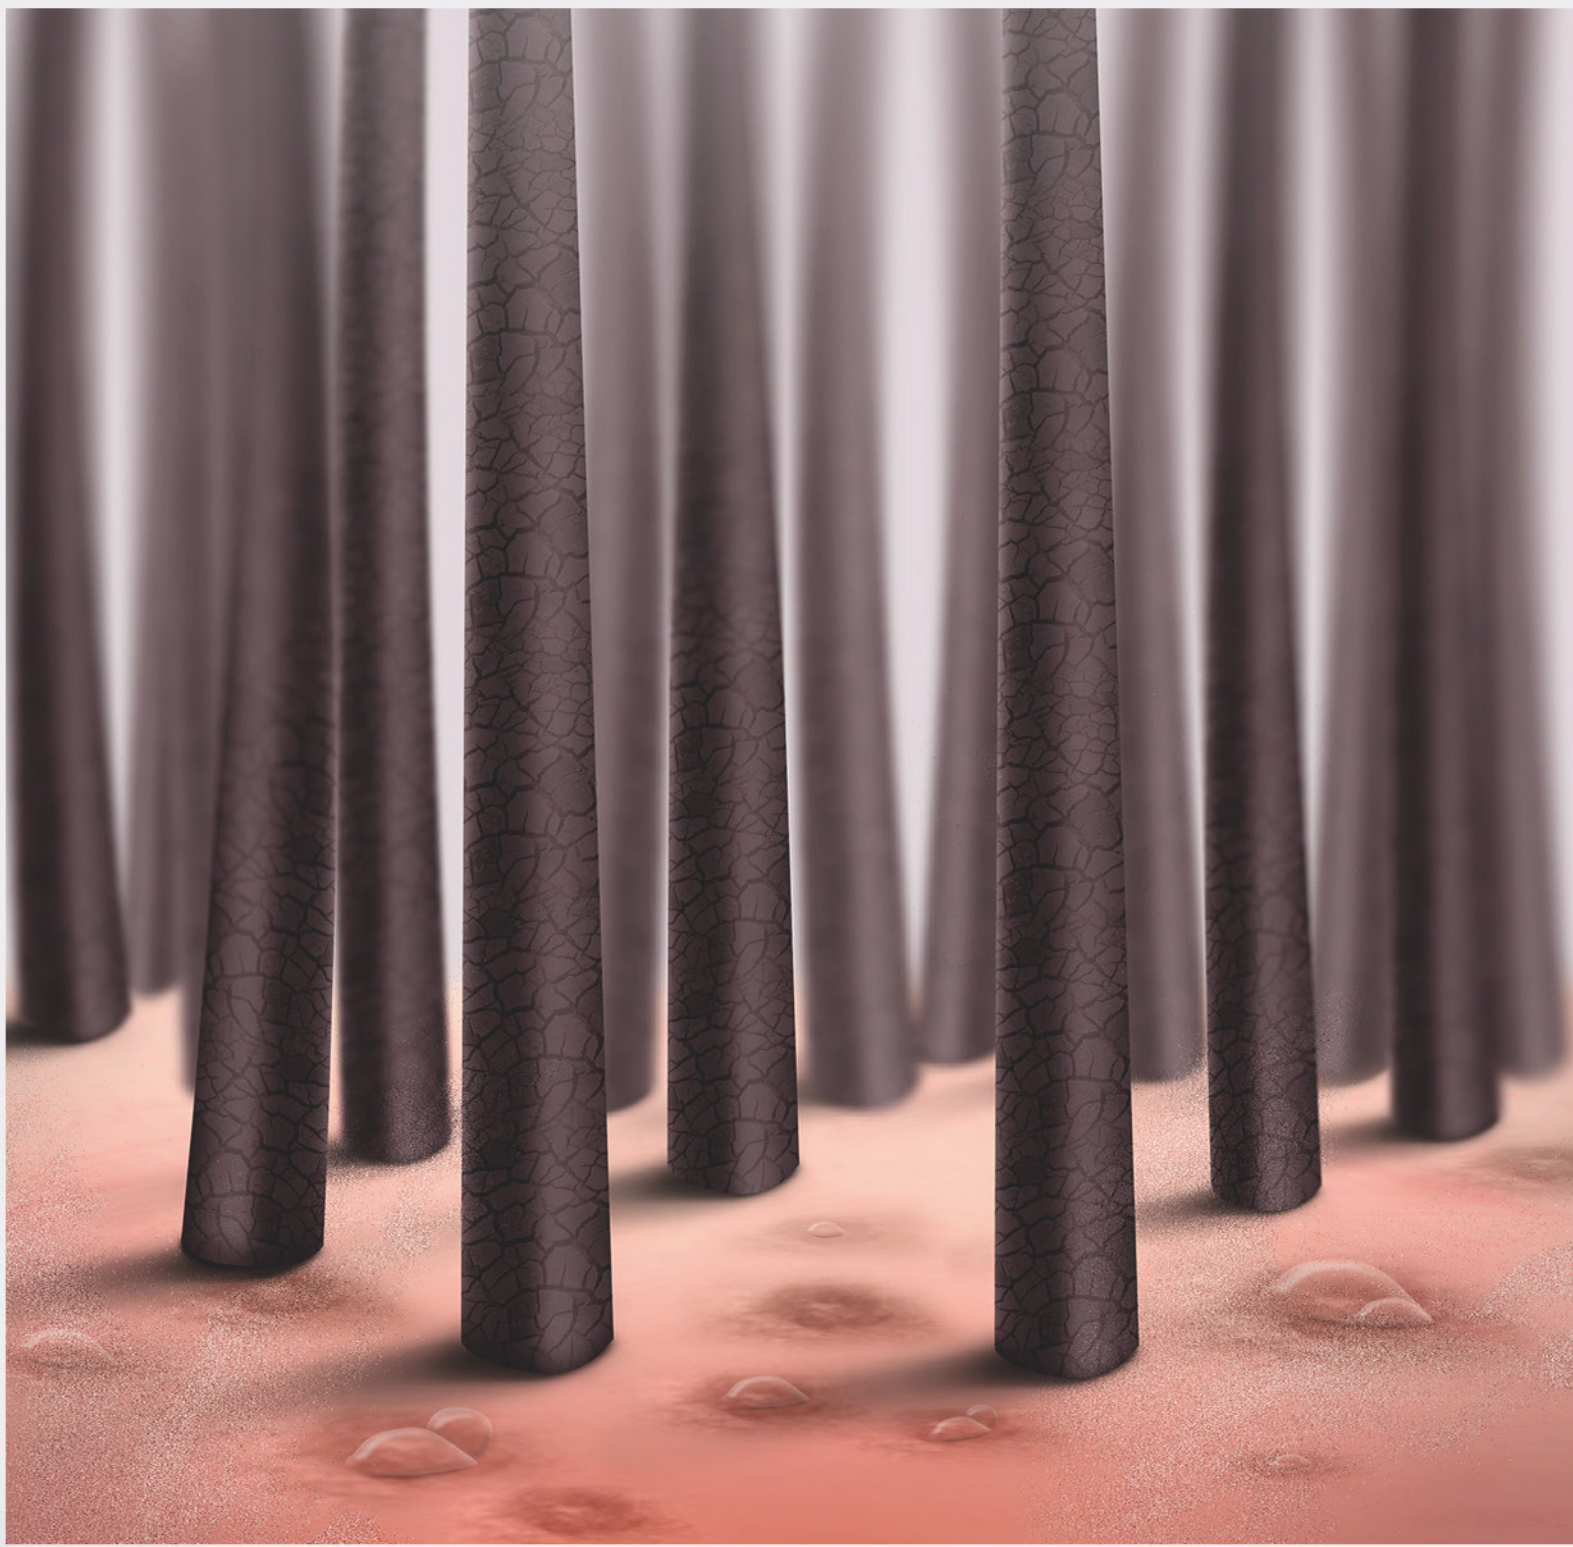

The Scalp Is the “Soil” That  
Feeds and Supports the Hair –  
Healthy hair comes from a  
healthy scalp.

# DO YOU KNOW? Scalp Is One of the Thinnest Skins in the Body

---

Due to the thin stratum corneum, the scalp is 40 times less resistant to chemicals compared to other skin areas.

More than 90%  
of shampoos

More than 90% of shampoos on the market include SLS/SLES or other harmful chemicals that cause transdermal toxicity. If toxins are not eliminated immediately, they might accumulate in the body.

# Why Is It Necessary to Detox the Scalp?

---

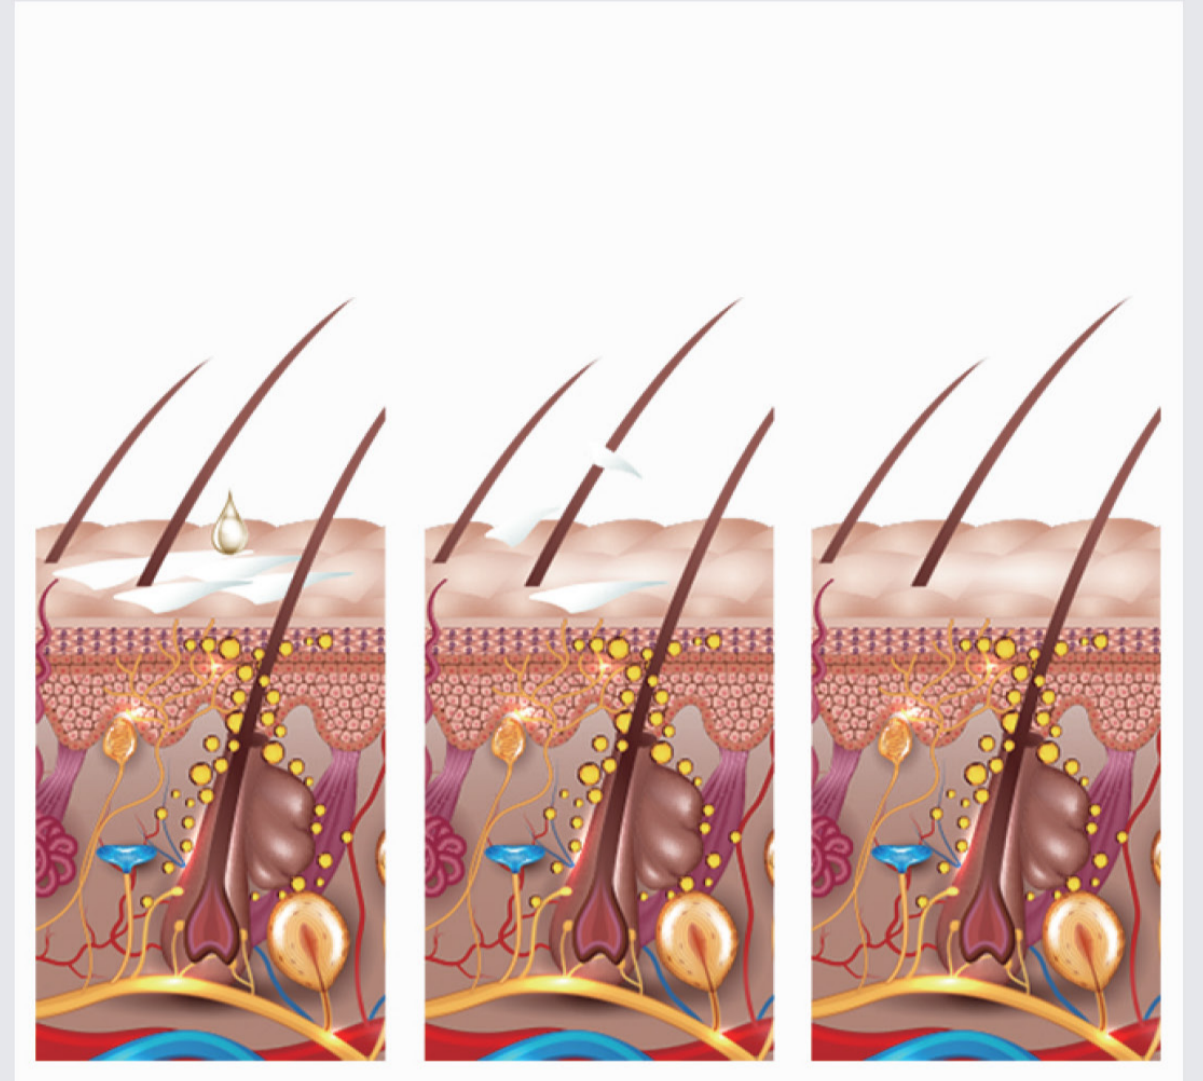

1 Hair loss happens when scalp follicles get clogged.

---

2 Chemical shampoos have a long-term negative impact on the scalp barrier.

---

3 Hair cell permeability in the epidermis is reduced, resulting in flat hair.

4 The scalp is unable to absorb nutrients, resulting in lackluster hair.

---

5 Itchy scalp.

---

6 Your scalp literally needs to breathe.

---

7 Transdermal toxins can permeate thin stratum corneum areas like reproductive organs. It affects hormonal balance and results in infertility.

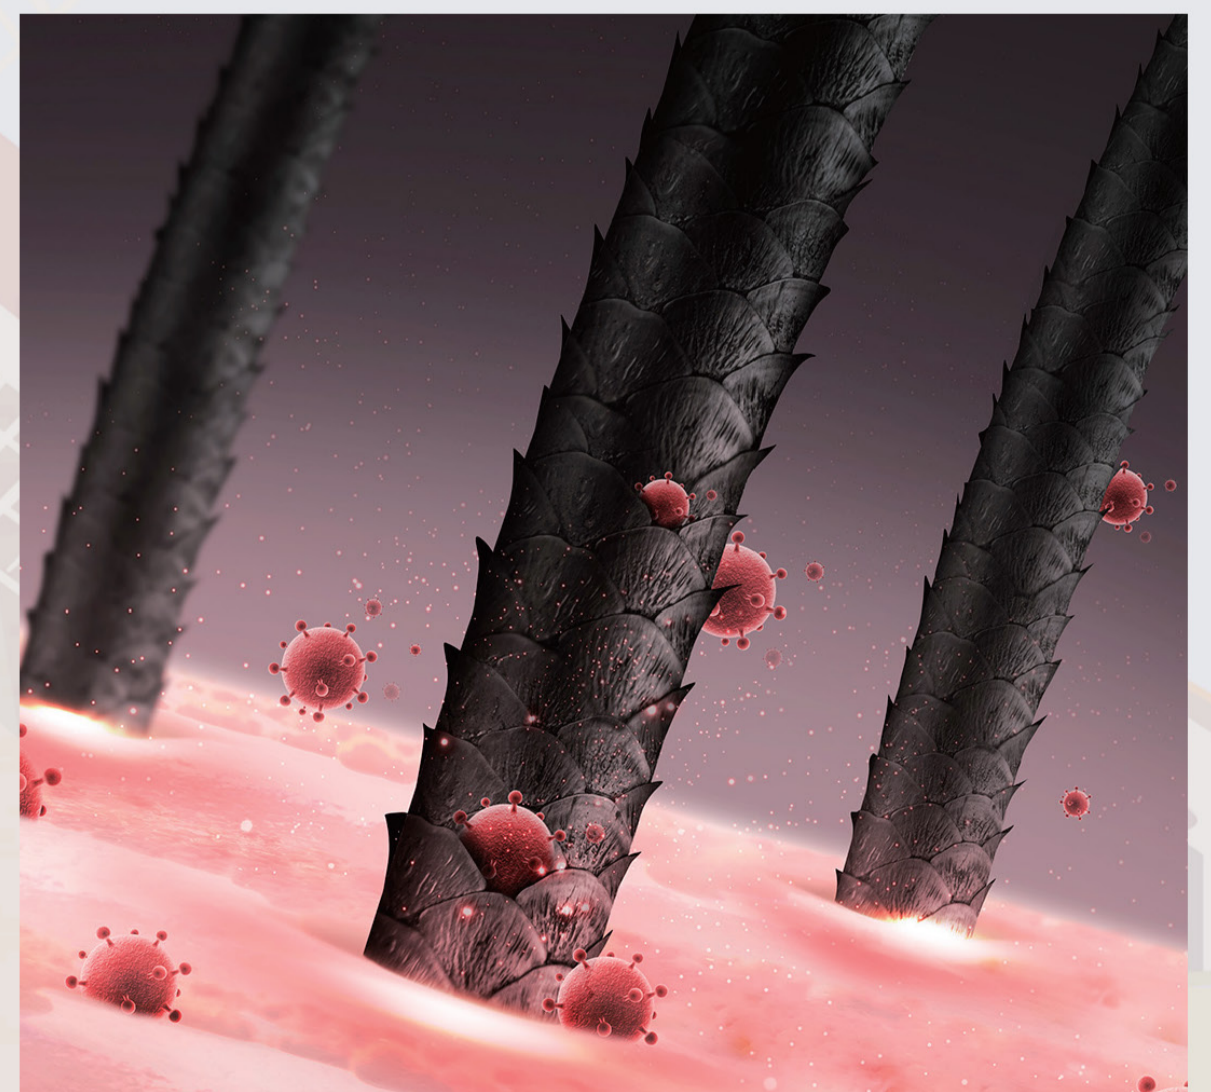

8 Transdermal toxicity occurs in the body, causing numerous skin allergies and asthma attacks, as well as a weakening of the immune system.

---

9 Congenital deformities are caused by transdermal toxins that easily reach the uterus.

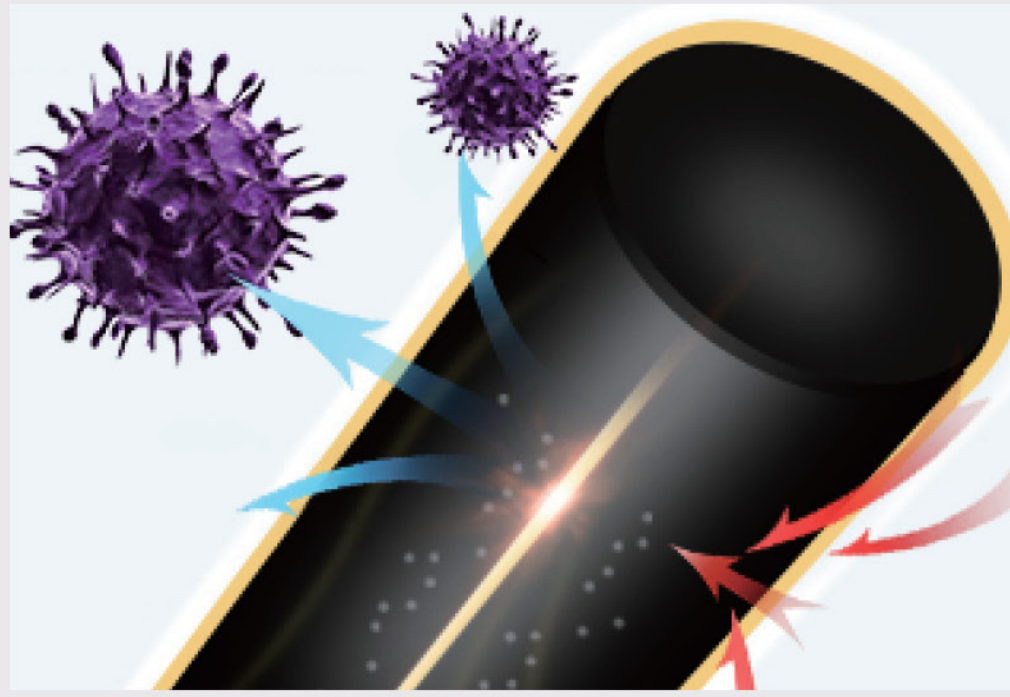

---

10 Brain diseases, major mental system illnesses, and even cancer can all be caused by transdermal toxicity.

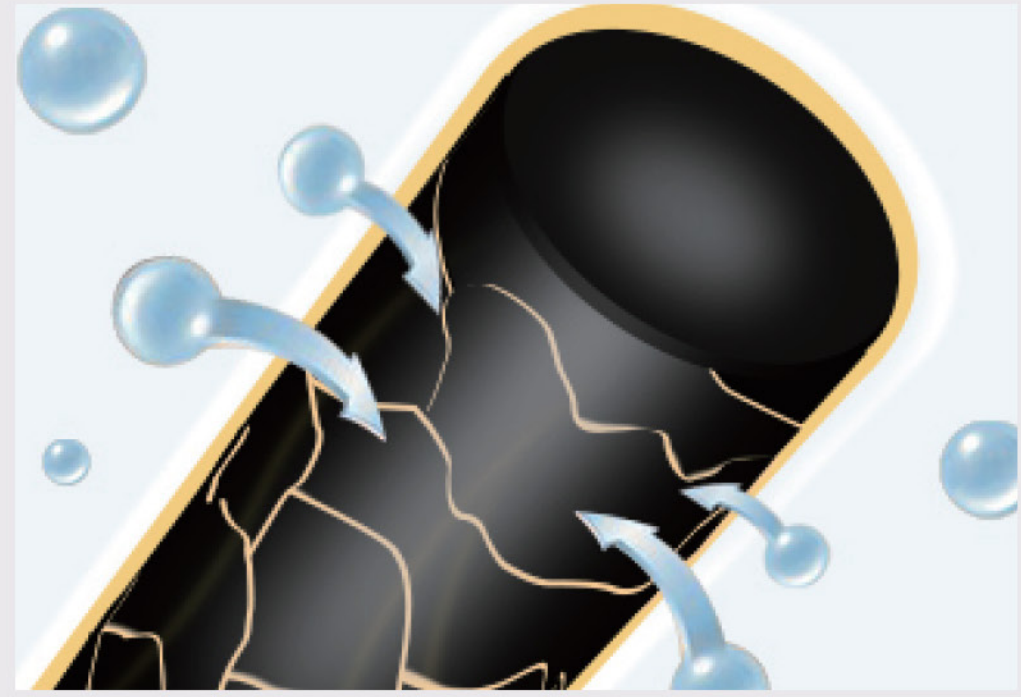

# How Can DTOX Aid in the Detoxification of the Scalp and Hair?

## Step1

Easily export toxins from the scalp and hair.

## Step2

Infiltrate the body to detoxify and effectively decompose the transdermal poison in the body.

## Step3

Added bioactive ingredients.

## Step4

100% antibacterial biological restoration.

## Step5

100% natural imported ingredients.
